2. How the Armytage Asian Fund - Infrastructure and Real Estate works

The Armytage Asian Fund - Infrastructure and Real Estate is a registered managed investment scheme. The Fund is governed by the Constitution. The Fund comprises assets which are acquired in accordance with the Fund’s investment strategy. Investors receive units in the Fund when they invest. In general, each unit represents an equal interest in the assets of the Fund subject to liabilities; however it does not give the investor an interest in any particular asset of the Fund.

<i>Applying for units</i>	<p>Investors can acquire units by completing an Application Form (“Application Form”) and sending it to us. The minimum investment amount for the Fund is \$50,000.</p> <p>The price at which units are acquired is determined in accordance with the Constitution (“Application Price”). The Application Price on a Business Day (as defined in the Reference Guide), is in general terms, equal to the net asset value of the Fund, divided by the number of units on issue and adjusted for transaction costs (“Buy Spread”).</p> <p>The Application Price will vary as the market value of assets in the Fund rises or falls.</p>
<i>Making additional investments</i>	<p>You can make additional investments into Fund at any time by sending us your additional investment amount together with a completed Application Form. The minimum additional investment into the Fund is \$5,000.</p>
<i>Distributions</i>	<p>The Fund usually distributes income semi-annually at the end of June and December. Distributions are calculated on the last day of each accounting period end (30 June and 31 December), and are normally paid to investors within 14 days of the period end. EQT may amend the distribution frequency without notice.</p> <p>An investor’s share of any distributable income is calculated in accordance with the Constitution and is generally based on the number of units held by the investor at the end of the distribution period and the distributable income.</p> <p>In some circumstances, where an investor makes a large withdrawal request (5% or more of the units on issue at the start of the relevant distribution period), their withdrawal proceeds may be taken to include a component of distributable income.</p> <p>Investors can have their distribution reinvested or paid to a nominated bank account. Investors who do not indicate a preference will have their distributions automatically reinvested.</p> <p>Indirect investors should review their IDPS guide for information on how and when they receive any income distribution.</p>
<i>Access to your money</i>	<p>Investors of the Fund can withdraw their investment by completing a written request to withdraw from the Fund and sending it to Linear Asset Management, PO Box 482 Collins St West VIC 8007. The minimum withdrawal amount is \$5,000. Once we receive your redemption request, we may act on your instruction</p>

without further enquiry if the instruction bears your account number or investor details and your (apparent) signature(s), or your authorised signatory's (apparent) signature(s).

EQT will generally allow investors in the Fund to access their investment within 7 days of receipt of a withdrawal request by transferring the redemption proceeds to your nominated bank account. However, in some circumstances (such as when there is a freeze on withdrawals) you may not be able to request a withdrawal of your funds within this usual period. Moreover, the Constitution allows EQT to make payment up to 30 days after receipt of a request (which may be extended by a further 30 days in certain circumstances).

EQT can deny a withdrawal request in certain circumstances, including where accepting the request would cause the Fund to cease to be liquid or where the Fund is not liquid (as defined in the Corporations Act). When the Fund is not liquid, an investor can only withdraw when EQT makes a withdrawal offer to investors in accordance with the Corporations Act. EQT is not obliged to make such offers.

The price at which units are withdrawn is determined in accordance with the Constitution ("Withdrawal Price"). The Withdrawal Price on a business day, is in general terms, equal to the net asset value of the Fund, divided by the number of units on issue and adjusted for transaction costs ("Sell Spread"). The Withdrawal Price will vary as the market value of assets in the Fund rises or falls.

We reserve the right to fully redeem your investment upon 30 days notice if your investment balance in the Fund falls below \$40,000 as a result of processing your redemption request.

If you have invested indirectly in the Fund through an IDPS, you need to provide your withdrawal request directly to your IDPS Operator. The time to process a withdrawal request will depend on the particular IDPS Operator.

3. Benefits of investing in the Armytage Asian Fund - Infrastructure and Real Estate Fund

Armytage offers an opportunity to invest in a Fund with exposure to a long duration theme – the industrialisation of the Asia Pacific region. It offers this exposure in a low risk fashion, via investment in high barrier to entry assets with sustainable and growing cash flows.

The Armytage Asian Fund aims to provide an investment in largely stabilised income generating assets with high barriers to entry. These include ports, toll roads, shopping centres, industrial and commercial buildings, regulated utilities and airports, and are generally characterized by low relative economic sensitivity, pricing power and long duration cash flows.

The Fund favours investment in companies with high quality management that follow a disciplined capital allocation process, and have a focus on shareholder returns. It aims to generate strong absolute returns over the medium to long term, with less volatility than regional equity indices. The Fund provides a better alternative to real estate only funds – and a broader investment universe means better diversification and greater alpha generation potential.

Our investment process is overlaid by risk management at both portfolio and individual stock levels. Geographical parameters are defined at the portfolio level to ensure sufficient diversity amongst holdings.

4. Risks of managed investment schemes

All investments carry risk. Different investment strategies may carry different levels of risk, depending on the assets that make up the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The table below highlights the significant risks you should consider when deciding whether to invest in the Fund. You may want to consider these risks in light of your risk profile. Your level of risk will vary depending on a range of factors, including your age, the investment time frame (how long you wish to invest for), your other investments or assets and your risk tolerance.

We do not guarantee the liquidity of the Fund's investments, repayment of capital or any rate of return or the Fund's investment performance. The value of the Fund's investments will vary. You may lose money by investing in the Fund and your investment in the Fund may not meet your objectives. The level of returns will vary and future returns may differ from past returns. Laws affecting managed investment schemes may also change in the future.

In addition, we do not offer advice that takes into account your personal financial situation, including advice about whether the Fund is suitable for your circumstances. If you require personal financial advice, you should contact a licensed financial adviser.

<i>Interest rate risk</i>	Changes in official interest rates can directly and indirectly impact on investment returns. Generally, an increase in interest rates has a contractionary effect on the state of the economy and thus the valuation of stocks.
<i>Fund risk</i>	As with all managed funds, there are risks particular to the Fund, including the possibility it could terminate or that the fees and expenses could change. There is also a risk that investing in the Fund may give different results than investing directly in the securities. We aim to keep fund risk to a minimum by monitoring the Fund and acting in your best interests.
<i>Market risk</i>	Changes in legal and economic policy, political events, technology failure, economic cycles, investor sentiment and social climate can all directly or indirectly create an environment that may influence (negatively or positively) the value of your investments in the Fund. In addition, a downward move in the general level of the equity market can have a negative influence on the performance of the Fund.
<i>International investing risk</i>	Risks of international investing include adverse currency fluctuations, potential political and economic instability, limited liquidity and volatile prices of international investments, limited availability of information regarding international investments, investment and repatriation restrictions and foreign taxation.
<i>Emerging markets risk</i>	Investing in emerging markets involves exposure to economic structures that are less diverse and mature, and to political systems that are less stable, than those of developed countries. In addition, issuers in emerging markets may experience a greater degree of change in earnings and business prospects than would companies in developed markets.
<i>Currency risk</i>	The Fund may invest in securities denominated in currencies of other countries and, if their currencies change in value relative to the Australian dollar, the value of the investment can change. The Fund aims to reduce the impact of adverse movements in overseas currencies by Hedging. There can be no assurance that the Fund will be Hedged at any, or all, times or that the Investment Manager will be successful at employing a Hedging strategy.
<i>Company specific</i>	There may be instances where a company's securities will fall in price because of company specific factors (for example, where a company's major product is subject to a product recall). The value of a company's securities can also vary because of changes to management, product, distribution or the company's business environment.
<i>Legal risk</i>	There is a risk that laws, including tax laws, might change or become difficult to enforce. This risk is generally higher in emerging markets.
<i>Investment selection risk</i>	The Investment Manager uses an investment selection process to identify investment opportunities which it believes are mispriced by the sharemarket. By investing in such companies, there is the risk that the sharemarket may take time to understand the value of these companies, or alternatively, continue to take a different view on the value of such companies and price them downwards. The risk is mitigated to some extent by the knowledge and experience of the Investment Manager.
<i>Concentration risk</i>	The concentrated nature of the investments of the Fund will reduce the potential benefit of diversification. The potential benefit of diversification is to reduce Volatility of investments. As the Fund has a concentrated portfolio of investments it may experience higher volatility than a more diversified portfolio.
<i>Stock selection risk</i>	The Investment Manager may make poor investment decisions resulting in substandard returns (for example where the Investment Manager invests in a company that significantly underperforms the share market). This risk is mitigated to some extent by the knowledge and experience of the Investment Manager.
<i>Liquidity risk</i>	There may be times when securities may not be readily sold (for example, in a falling market where some traded securities may become less liquid). However, trading volumes of stock are generally sufficient to satisfy liquidity requirements when necessary. The Investment Manager will attempt to mitigate liquidity risk by ensuring the Fund has sufficient cash to meet liquidity requirements. Note that neither the Responsible Entity nor the Investment Manager guarantees the liquidity of the Fund's investments.
<i>Infrastructure and real estate</i>	The securities in which the Fund invests generally invest the majority of their assets in direct infrastructure and real estate related assets. Direct infrastructure and real estate related assets can be illiquid and

<i>risk</i>	change materially in value as a result of a change in economic conditions, demand and supply influences, government, legal and other influences. As a result, valuations of such assets can change, as well as the level of income derived from them.
<i>Derivative risk</i>	<p>Generally, in the case of Derivatives, fluctuations in price will reflect movements in the underlying assets, reference rate or Index to which the Derivatives relate. The use of Derivatives to reduce the risk of movements in an underlying asset, reference rate or Index involves 'basis risk', which refers to the possibility that Derivatives may not move perfectly in line with the underlying asset, reference rate or Index. As a consequence, Derivatives cannot be expected to perfectly Hedge the risk of the underlying asset, reference rate or Index.</p> <p>Other risks associated with Derivatives may include:</p> <ul style="list-style-type: none"> ▪ that they can lose value because of a sudden price move or because of the passage of time; ▪ potential illiquidity of the Derivative; ▪ the Fund being unable to meet payment obligations as they arise; and ▪ the counterparty to any Derivative contract not meeting its obligations under the contract; ▪ significant volatility in prices; and ▪ where Derivatives are highly leveraged, an increase in the risk associated with an investment.

5. How we invest your money

Before choosing whether to invest in the Fund you should consider the likely investment return, the risks of investing and your investment time frame.

<i>Investment objective</i>	<p>The Fund aims to provide investors with an investment in assets which generate largely stable income and aim to produce strong absolute returns over the medium to long term with lower Volatility than regional equity Indexes.</p> <p>The Fund's performance objective is to deliver a long-term return to investors that is in excess of 10% per annum after fees and before taxes.</p>								
<i>Minimum suggested timeframe</i>	The minimum suggested investment time frame for the Fund is 5 to 7 years.								
<i>Risk level of the Fund</i>	<p>High.</p> <p>There is a risk investors may lose some or all of their investment. Higher risk investments tend to fluctuate in the short term but can produce higher returns than lower risk investments over the long term.</p>								
<i>Investor suitability</i>	This Fund is designed for investors who seek an investment in infrastructure and real estate, but require greater diversity and liquidity than a direct investment in assets.								
<i>Investment style and approach</i>	<p>The investment process utilises both a Top-down and Bottom-up investment approach. A Top-down approach of quantitative and qualitative analysis is used to determine exposures to the economies within the region. A Bottom-up process then determines stock selection within those regional exposures. The Bottom-up process relies on Fundamental Research to arrive at a valuation and portfolio weight. Key inputs into the valuation process include: demand and supply characteristics of each market, the competitive position of assets, management quality and the return on capital able to be generated by an asset.</p> <p>The Fund will be able to invest in securities listed on any recognised securities exchange however the focus will be on securities within the Asia-Pacific region.</p> <p>The assets of the Fund will generally be invested in accordance with the following:</p> <table border="1"> <thead> <tr> <th>Allocation</th> <th>Range</th> </tr> </thead> <tbody> <tr> <td>Infrastructure related assets</td> <td>20 - 80%</td> </tr> <tr> <td>Real estate related assets</td> <td>20 - 80%</td> </tr> <tr> <td>Cash and cash equivalents</td> <td>0 - 50%</td> </tr> </tbody> </table>	Allocation	Range	Infrastructure related assets	20 - 80%	Real estate related assets	20 - 80%	Cash and cash equivalents	0 - 50%
Allocation	Range								
Infrastructure related assets	20 - 80%								
Real estate related assets	20 - 80%								
Cash and cash equivalents	0 - 50%								
<i>Labour, environmental, social and ethical considerations</i>	EQT and Armytage do not take into account labour standards or environmental, social or ethical considerations for the purpose of selecting, retaining or realising investments of the Fund.								
<i>Fund performance</i>	Up to date information on the performance of the Fund will be available by calling Armytage on (03) 9639 8709 or visit www.armytage.com.au .								

6. Fees and costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns.

For example, total annual fees and costs of 2% of your fund balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100 000 to \$80 000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask the fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** website (www.moneysmart.gov.au) has a managed investment fee calculator to help you check out different fee options.

The information in the following table can be used to compare costs between different simple managed investment schemes. Fees and costs are deducted from the assets of the Fund and reduce the investment return to unit holders.

Type of fee or cost	Amount
Fees when your money moves in or out of the Fund	
Establishment fee	Nil
Contribution fee	Nil
Withdrawal fee	Nil
Termination fee	Nil
Management costs	
The fees and costs for managing your investment	1.96% * p.a. (net of GST and RITC) of the net asset value of the Fund *The amount of this fee can be negotiated. Refer to 'Differential fees'
Performance fee	10.25% (net of GST and RITC) of the investment return above the Fund's Performance Hurdle is payable to the Investment Manager as an expense of the Fund. See 'Performance fee' below for more information on the performance fee.

Further information regarding fees

<i>What do the Management costs pay for?</i>	The Management costs include Responsible Entity fees, investment management fees, custodian fees, administration fees and other expenses. It is calculated and accrued daily based on the net asset value ("NAV") of the Fund. The accrued fees are paid in arrears from the Fund at the end of each month. The Management costs reduce the NAV of the Fund and are reflected in the unit price.
<i>Performance fee</i>	A performance fee of 10.25% (net of GST and RITC) of the investment performance of the Fund above the Performance Hurdle of the Fund is payable to the Investment Manager. The Performance Hurdle for the Fund is an absolute return of 10% p.a. based on the Adjusted Withdrawal Price. The Adjusted Withdrawal Price is withdrawal price increased by the amount of estimated expense recoveries (including any accrual of performance fee expense), paid and payable during the accrual interval, on a per unit basis. If payable, a performance fee is paid in arrears to the Investment Manager at the end of each 12 month period ending 30 June out of the assets of the Fund. It is calculated and accrued each time the Fund unit price is struck.
<i>Buy/Sell spread</i>	The Buy/Sell Spread reflects the estimated costs incurred in buying or selling assets of the Fund when investors invest in or withdraw from the Fund. The Buy/Sell Spread is an additional cost to the investor but is incorporated into the unit price and incurred when an investor invests in or withdraws from the Fund and is not separately charged to the investor. The Buy/Sell Spread is paid into the Fund and not paid to EQT or the Investment Manager. The estimated Buy/Sell Spread is 0.25% upon entry (\$12.50 for each investment of \$5,000) and 0.25% upon exit (\$12.50 for each \$5,000 withdrawn).
<i>Can the fees change?</i>	Yes, all fees can change without investor consent, subject to the maximum fee amounts specified in the Constitution. We have the right to recover all proper and reasonable expenses incurred in managing the Fund and as such these expenses may increase or decrease accordingly. We will provide investors with notice of any proposed fee change in accordance with the law. Expense recoveries and Buy/Sell Spreads may change without notice, for example, when it is necessary to protect the interests of existing members and if permitted by law. In most circumstances the Constitution defines the maximum fees that can be charged for fees described in this PDS.

<i>Differential fees</i>	A separate fee arrangement may be negotiated from time to time with certain investors who are Wholesale Clients.

Example of annual fees and costs for the Fund

This table gives an example of how the fees and costs in the Fund can affect your investment over a 1 year period. You should use this table to compare this product with other managed investment products.

Terms and conditions for collection of Tax File Numbers (TFN) and Australian Business Numbers (ABN)

Collection of TFN and ABN information is authorised and its use and disclosure strictly regulated by tax laws and the Privacy Act. Investors must only provide an ABN instead of a TFN when the investment is made in the course of their enterprise. You are not obliged to provide either your TFN or ABN, but if you do not provide either or claim an exemption we are required to deduct tax from your distribution at the highest marginal tax rate plus Medicare levy to meet Australian taxation law requirements. For more information about the use

of TFNs for investments, contact the enquiries section of your local branch of the Australian Taxation Office. Once provided, your TFN will be applied automatically to any future investments in the Fund where formal application procedures are not required (e.g. Distribution reinvestments), unless you indicate, at any time, that you do not wish to quote a TFN for a particular investment. Exempt investors should attach a copy of the certificate of exemption. For super funds or trusts list only the applicable ABN or TFN for the super fund or trust.

When you sign this Application Form you declare that you have read and agree to the declarations above.
